

ROAROCKET

May 20, 2016

To whom it may concern,

This letter is in response to your school's request for a Sole Source letter from our company.

Roarocket supplies the materials, tools and technology for a specific method of building skateboards. We are the ones who invented this method of building skateboards. Roarocket supplies the materials so that students can laminate from scratch, a custom skateboard using no power tools.

Roarocket Skateboard Company is the sole and only provider of this technology and material in the form of our kits. It is important to know that Roarocket holds the patents for this process in the USA and Canada. We are proud to say that our idea was originally created in the wonderful state of Hawaii!

We appreciate your school being a participant in the use of our technology, and we will provide as much support as we can to further the education of students through the focus of building handmade custom skateboards.

Sincerely,

Norah Jackson
